

FALOMO SHARON (FRONTEND DEVELOPER)

Falomosharl@gmail.com

PROFILE

A Passionate Software engineer with a commitment to building responsive, standards compliant software solutions and scalable user Interfaces. My expertise spans across planning, development, designing, maintaining, testing, and deployment of applications throughout the software development lifecycle with best practices. Focusing on creating exceptional user experiences. website cross browser compatibility, consuming RESTful APIs and efficient solutions. I am open to learning new technologies, with a commitment to growth. I thrive in fast paced, agile environments and creating solutions that enhances user experiences.

WORK EXPERIENCE

EmpowerHerCommunity

Frontend Engineer

October 2022 - Present

- collaborated with a team of developers (frontend and backend), designers and project manager to create a full-stack website for the organization
- Contributed to brainstorming sessions, troubleshooting, and the successtul deliverv of proiect milestones
- Strengthened teamwork and communication skills through close collaboration with fellow engineers
- As the lead of the engineering team l'm in charge of maintaining and improving the site. I also translate the figma design into pixel perfect ui

HOKC Developers Team

Frontend Developer

November 2023 - April 2024

- developed a dedicated church website, separate from the existing QR code system, to improve accessibility for users unable to use biometric sign-ins
- Collaborated with team members to plan, design, and implement the website, ensuring effective communication and task delegation.
- Gained hands on experience with Typescript, leveraging strict type enforcement to enhance code quality and maintainability.

Interswitch

IDC Babcock Campus Ambassador

April 2022 - July 2024

- Conducted interactive workshops and meetings to educate students on Interswitch APIs and their application in project development.
- Provided technical guidance on integrating APIs into student projects, fostering collaboration and problem-solving within peer groups.
- Promoted the adoption of Interswitch technologies through effective communication and community engagement.

SKILLS

Technical skills: Html, CSS, Javascript, React, Typescript, Node js, Firebase, Supabase, Git, Figma, Three.js
Soft skill: Critical thinking, Creativity, Analytical thinking, Collaborative skill, Growth oriented

PROJECTS

Recipe Finder React, Firebase, Tailwind css, Spoonacular Api <https://recipefindersearch.netlify.app/>
Developed a recipe search tool offering a "What's in My Fridge" feature to suggest recipes based on available ingredients. Integrated authentication, data caching with Firestore(backend as service), and real-time loading states for a seamless user experience. Solved the common problem of meal planning by providing personalized recipe suggestions, reducing food waste, and promoting convenience.

Scissors Site React, Tailwind css, Shadcn ui, Supabase <https://scissors-zeta.vercel.app/>
Built a link management platform that enable users to shorten, customize, and share links while providing a dashboard to track clicks, locations, and devices for better analytics. • Addressed the real life problem of managing and analyzing shared links effectively, enhancing user productivity and decision-making.

EDUCATION

Diploma in Software Engineering (Frontend)

Altschool Africa

September 2024

August 2023

BSC in Accounting

Babcock University

July 2024

August 2019
